Operations Portfolio: Independent QA & PDF Feature Verification

Release edition 3.0 | 2026-10-27 | All scenarios fictional

Source-to-output reconciliation checks

Workflow	Independent measure	Result
Customer intake	120 = 104 accepted + 10 duplicate + 6 hold	PASS
Customer master	104 distinct approved contact emails	PASS
Billing close	18,520.00 - 5,815.00 - 70.00 = 12,635.00	PASS
Receivable inputs	24 invoices, 13 receipts, 2 approved credits	PASS
Data stewardship	480 source, 462 canonical, 27 decisions, 14 exceptions	PASS
Medical documentation	6 original + 6 added synthetic cases	PASS

Excel verification

01_Data_Entry_Verification/EXCEL_Customer_Data_Entry_and_Quality_Control.xlsx: 14 worksheets and 2 native chart XML object(s). Formulas were evaluated in the build process; control totals matched; no formula-error cells were found in the final inspected workbook models.

03_Billing_Payroll/EXCEL_Billing_AR_Reconciliation_24_Invoices.xlsx: 4 worksheets and 1 native chart XML object(s). Formulas were evaluated in the build process; control totals matched; no formula-error cells were found in the final inspected workbook models.

Functional PDF demonstrations

Feature	What was checked	Result
Fillable forms	6 role-related form templates with 67 total field widgets	PASS
Filled vs flattened	Editable filled copy; 0 widgets in flattened output	PASS
Genuine redaction	Neither fictional sensitive value extractable	PASS
Bookmarks	Combined searchable reader: 62 pages / 157 outline entries	PASS
Searchability	Original Word case studies export as live-text PDFs	PASS

Scope and QA boundaries

The source records, operations, approved outputs, audio and performance numbers are synthetic training examples. This audit verifies structural/arithmetical coherence and selected document features, not real work history, licensed professional competence, complete PDF accessibility conformance, or employment eligibility. A personal typing or transcription score requires a separately proctored/practiced assessment.

Recommended manual checks: edit a data-entry source cell, confirm the Excel disposition changes, review sample audio against transcript, type into a PDF form and save, and inspect outlines in Adobe Acrobat or another full-featured PDF viewer.
